ACCESS CONTROL SYSTEMS

Our Access Control Systems

Our Access control systems serve a critical role in any sensitive area, allowing only the right persons to enter at a given time. We install Access Control Systems to allow authorized personnel to enter controlled, restricted, or secure spaces

Mandatory Access Control (MAC)

- Government and military organizations
- Highly regulated industries such as healthcare and finance
- Environments with extremely sensitive data

Discretionary Access Control (DAC)

- Small to medium-sized businesses
- Collaborative environments where users need flexibility in granting access
- Environments with less stringent security requirements

Discretionary Access Control (DAC)

- Large organizations with many users and varied access needs
- Enterprises with dynamic user populations
- Environments where roles can be clearly defined

RAZOR WIRE & ELECTRIC FENCES

About Razor Wire & Electric Fences

We do install Razor Wire And Electric Fence as the first line of defense against intrusion to your premises. Our Razor Security Wire: Strong, sharp and tightly packed, razor wire will make any intruder think twice about attempting to scale the walls and fence of your premises.

Electric Fence

- It's standard helps to ensure that shock from the fence is safe but strong enough to create a psychological barrier for the intruder.

Razor Wire

The multiple blades of a razor wire fence are designed to inflict serious cuts on anyone attempting to climb through and therefore have a strong psychological deterrent effect. The points of a razor wire are very sharp and made to rip and grab onto clothing and flesh.

Fire & Alarm systems

About alarm systems

We install for you building system designed to detect, alert occupants, and alert emergency forces of the presence of fire, smoke, carbon monoxide, or other fire-related emergencies.

✓ Fire System

- It's standard helps to ensure that shock from the fence is safe but strong enough to create a psychological barrier for the intruder.

✓ Alarm System

We install security alarm sensor systems that detect movement when a door or window is opened. The sensor then triggers a strobe light or siren, indicating that someone may be trying to break in. Motion detectors can monitor large areas in a house or business premises. In the event of any movement within its range, the device sounds a siren or sends a distress signal to programmed phone numbers for response. The intelligent motion detectors can tell the difference between an intruder and a family pet.
